

STAT'Mania

The most up-to-date methods for displaying statistics are now within everyone's grasp.

STAT'Mania is a new type of statistical software program, just as simple to understand and use as any office software.

STAT'Mania allows the users to easily apply to their data the most current statistical methods, in order to obtain their results in graph or table form of exceptional quality.

STAT'Mania gives the following analyses:

- Factorial analyses,
- Hierarchical classifications in ascending or descending order,
- Multiple or simple regressions,
- Factorial analyses,
- Analyses of variance,
- Automatic research of the most significant junctions,
- Automatic cross-tabulation analysis,
- Analysis of open-ended questions,
- Numerous parametric or non parametric tests with one or more variable.

STAT'Mania functions on the files based on the Ethnos format but can also load and analyse files created with other formats. These could be tables from Excel, databases in the Access, Dbase or Paradox format, or even simple files (in fixed or limited ASCII format).

On request, we can also provide you with access to any other sort of database, whether local or distant.
